

SPECIAL OFFER FOR NURSING STATIONS

Empower & Protect Your Nurses by Installing Circadian ZirLight LEDs

Replace your harmful fluorescent and LED blue-rich lighting with evidence-based circadian lighting which mitigates the health risks of circadian disruption at night.

PROBLEM: Traditional blue rich light sources at night (e.g. LEDs and fluorescent) cause circadian disruption, a well recognized health risk for nurses and night staff.

SOLUTION: Circadian ZirLight has developed and patented LEDs that automatically regulate blue light content to provide the right light at the right time for well-being and performance. Only ZirLight has:

- **NightSafe™ LED:** The only UL verified LED to emit less than 2% blue light at night (standard LEDs have 10x the blue light output at night).
- **DaySync™ LED:** Stimulates circadian rhythms and boosts daytime energy.
- **DynamicBlu™ Spectrum Control:** Automatically regulate blue light 24/7 to help sync circadian rhythms.

Circadian ZirLight Fixtures are Perfect for Nurse Stations, Med and Treatment Rooms, Labs, Hallways and other 24/7 areas.

Less than 2%
blue light content
at night

**Zirc NightSafe™ only LED
in world UL verified to emit
<2% blue light at night**

25% Discount: On Circadian ZirLight LED fixtures ordered before August 31, 2021 for nursing stations, and other nurse workplaces. For further information or a quote email info@circadianlight.com or call 781-439-6333
